VACCINATION

The "Hidden" Facts

by Ian Sinclair

ISBN 0 646 08812 2

Available: NEXUS Magazine,
PO Box 30, Mapleton, Qld 4560

Price: \$29.00 (inc. p&p)

If I had to suggest one book to read on vaccinations, this would be it.

This book covers all the aspects of the vaccination argument. It is easy to read, contains many quotes from doctors, and includes the results of many studies.

The book includes statistics for the incidence of each disease that vaccinations exist for, but these statistics date back a lot further than most medical books, or information given to the public, show. It shows the diseases were declining long before vaccinations were introduced.

For an example of the contents of this book, please refer to the article beginning on page 27 of this issue.

Highly recommended reading!

THE POISONED NEEDLE

by Eleanor McBean

Published by Health Research,
California, USA, 1974

Price: \$15.00, from Sydney
Esoteric Bookshop (see ad on p. 59)

This is a rare reprint of an old classic that was first published in 1957. It is interesting to read about the awareness and information available at that time. It provides some very interesting infor-

mation on diseases on the increase over the last 70 years (before 1957). These include insanity, cancer, anaemia, epilepsy, heart disease, diabetes (1,800%) and polio.

Other areas the book covers include how smallpox declined before vaccination was enforced, the history of vaccination, cancer caused by vaccination, syphilis and vaccination, deaths from vaccination, medical interference and the hidden dangers in polio vaccine.

The book has numerous case studies including photographs. The chapter on Cancer and Vaccinations shows a few cases of people who have had cancer develop out from the actual vaccination site, plus statistics showing how the rate of cancer has increased since the introduction of vaccinations.

"In the New York press, 26 January 1909, W. B. Clark stated:

'Cancer was practically unknown until cowpox vaccination began to be introduced. I have had to do with 200 cases of cancer and I never saw a case of cancer in an unvaccinated person.'"

This is a rare and hard to get book, on a subject that could well do with a lot of airing. If you are researching the subject for yourself or your family, take note—you will not want to immunise your children after reading this book!

A ROSICRUCIAN NOTEBOOK The Secret Sciences Used by Members of the Order by Willy Schrödter

Published by: Samuel Weiser, Inc.,
York Beach, Maine, USA, 1992
ISBN 0 87728 757 0
Available: Sydney Esoteric
Bookshop (see ad on page 59)
Price: \$39.00

Willy Schrödter spent a lifetime studying the secret Rosicrucian Order, out of which came this *Notebook*, first published in 1954 in German. Now translated into English, this highly personal account of the Rosicrucian secret sciences is a boon to students of the various esoteric traditions.

Schrödter collected and fully annotated information on such topics as blood telegraphy, ever-burning lamps, optics, spiritual skills in healing, transplantation, isopathy and magnetism.

He includes discussions on working with prana, making gold, the elixir of life, fakirism, hibernation, sylph lovers, elemental spirits, apparent death, Christ, and the mysterious *Rotae Mundi*.

A Rosicrucian Notebook is a particularly valuable resource, containing excerpts from private and previously unpublished sources.

ELECTROHEALING The Medicine of the Future by Roger Coghill

Published by: Thorsons (Harper
Collins), London, UK, 1992
ISBN 0 7225 2559 1
Available: Sydney Esoteric
Bookshop (see ad page 59)
Price: \$20.00

Bioelectromagnetics scientist Roger Coghill goes a step beyond his controversial research into the health effects of electromagnetic fields (see his controversial previous book, *Electropollution*).

Now, in more positive contrast, he focuses on the healing power of EMFs.

Coghill identifies seven categories of electrohealing's contribution to organic health. He traces its history and development, including suppressed ideas and neglected techniques such as haemorrhage irradiation (where the patient's blood is irradiated with ultraviolet light, then replaced).

Drawing on evidence from medical tests and case studies, Coghill gives some fascinating insights into his cerebral morphogenetic radiation theory—how the body and brain may use EMFs to maintain health and initiate the body's healing mechanisms.

Electrohealing shows how you can protect your body from harmful electromagnetic fields, how the body's own weak emissions of e-mag energy can be used in diagnosis, or be 'neutralised' to help the self-healing process.

(Did you know that walking across carpet with rubber shoes can develop a potential difference of 10,000 volts? This process will ensure that any friendly negative ions are repelled—and we become depressed and irritable!)

Roger Coghill's book is a timely addition to the body of knowledge on electromagnetism in healing—one of the cornerstones of 21st century medicine.

THE ANSWER TO KILLING CANCER

by Prue Hickey-Kelly

Publ: Prue Hickey-Kelly, 1990
ISBN 0 646 00872 2

Available: Prue Designs of WA,
PO Box 38, Doubleview, WA 6018
Price: \$15.00 (plus p&p)

First-time author Prue Hickey-Kelly has written an extremely personal account—tinged with both bitter anger and unflinching optimism—of her experiences with cancer.

Prue takes the reader along on her journeys of 'discovery' with the Australian medical profession, from her breast cancer diagnosis in 1985, to subsequent radiation damage, and mastectomy by 1988.

Her sense of abandonment, as well as her hope and courage, led her to investigate many alternative cancer treatments not necessarily readily available. She details treatments from China (the anti-tumour supertonic liquid 851, cure-all Pien Tze Huang, and ginseng), and Germany (Regeneresen homeopathic drug for treating chronic degenerative diseases)—and their commendable track records in those countries.

Prue also writes of her experiences in alternative therapy clinics in such diverse places as Mexico, Singapore, Sri Lanka, Greece and Germany. For the interested reader who wants to pursue directly, Prue has included contact details in the back of the book.

This is a touching, inspirational story for those who refuse to become medical statistics.

THE HIGHBRIDGE INCIDENT The Story Behind The Story

by Howard & Connie Menger

Published by Howard Menger
Studio, 845 28th Ave, Vero Beach,
Florida 32960, USA

Price: US\$35.00 (inc. postage)

Available: Sydney Esoteric
Bookshop (see ad on page 59)

This is not an easy book to obtain,
and will certainly not be found in many
bookshops anywhere.

The book is split into three parts.
Part one, written by Howard, deals with
his life's story, including the numerous
visits from, and trips with alien beings.
These very human-like aliens imparted
some very thought-provoking information
which is shared in Howard's story.

Part two is written by Howard's wife,
Connie, and is equally fascinating.

Part three covers Howard's incredible
scientific discoveries, including anti-
gravity and what appears to be a possi-
ble new form of propulsion. If you are
a 'mad scientist', I strongly recommend
you get this book.

All in all, this book is well worth the
effort to obtain. It gives the most sta-
ble and believable account of extrater-
restrial visitations I have ever read.

Very highly recommended!

THE ONLY PLANET OF CHOICE
Essential Briefings from Deep Space

Compiled by Phyllis V.

Schlemmer & Palden Jenkins

Published by: Gateway Books,
Bath, UK, 1993

ISBN 1 85860 003 0 (hardcover);

1 85860 000 6 (paperback)

Distributed by: Astam Books,
Stanmore, NSW. Tel: 02 550 3855

Price: \$24.95

This book is a compilation of dialogues between trance medium Phyllis Schlemmer and the Council of Nine, a group of nine universal beings who claim to have had a long (if not prime) involvement in humanity's evolution.

These transmissions, with important explanatory comments from British author/metaphysical researcher Palden Jenkins, challenge orthodox beliefs about the vast questions of our existence—who originally inhabited our planet; what and where heaven is; the how's and why's of reincarnation; the origins and motives of UFOs and extraterrestrials; and why humanity is in crisis over racism, greed, abuse of power, overpopulation, disease, freedom and much more.

The Only Planet of Choice elaborates on Planet Earth's special role in the universal order—spokesman for The Nine, Tom, reveals we've created a cosmic bottleneck with souls being trapped by the desire for repeated physical incarnation. The material sheds light on the past 34,000 years of human history—and before—including Atlantis; the origins of various religious beliefs and why they divide us; the significance of the Jewish people—and Jesus the Nazarene—in the scheme of things; and what we can do to enrich and fulfil our own and others' lives.

This is an intriguing, enlightening document, though it leaves the discerning reader yearning to know and understand more about ourselves and our place in the cosmos.

If you are a researcher of channelled information, you will find this book of immense interest.

CHURCHILL'S WAR (Part One) **The Struggle For Power**

by David Irving

Published by: Veritas Publishing
Company, Cranbrook, WA.6321

Price: \$40.00 postpaid, from New
Dawn International News Service,
GPO Box 3126FF, Melbourne 3001

What an amazing book! What an amazing author! So many university academics go and read twelve or so books on a subject and then write book number thirteen, but not David Irving.

Ranked as Britain's top historian, David Irving is the only person to have gone through the personal diaries of key generals and power figures of World War II.

His thoroughness and attention to detail has revealed many aspects of WWII history that are obviously not popular—*Churchill's War* is testimony to that.

Churchill is portrayed by our history books as a noble, brave and determined individual caring for the British empire. Unfortunately his personal diaries, and the personal diaries of people in power he corresponded with, do not mirror this image.

We thoroughly recommend any serious researcher of WWII history to obtain and read all of David Irving's excellent books.
